INSTALLATION INSTRUCTIONS FOR ROLL TOWEL MECHANISM

PARTIAL VIEW OF CABINET WITH #8370 ROLL TOWEL MECHANISM

INSTALLATION OF ROLL TOWEL MECHANISM

1. Unlock cabinet door with key provided.
2. Remove and retain (4) 1/4-20 machine screws from backplate. (A)
3. Open #8370 box and remove roll towel dispenser.
4. Place mechanism over holes on backplate and insert screws, retained from step 2, through slots in mechanism, leaving screws loose for final adjustment.
5. Swing door of cabinet over lever mechanism for fit.
6. If door closes properly then tighten screws. If fit is not right, move mechanism left or right and close door to check fit until proper alignment is obtained. Then open door and tighten screws.
7. If mechanism requires moving up or down then loosen screws (B) on backplate (do not remove) which has vertical adjustment slots for alignment of lever housing in door slot.
8. Tighten screws (B) while holding backplate and mechanism in position determined by door alignment check.
9. Load paper, close and lock door.
