

## AIA Continuing Education System

American Specialties Registered Provider Program Summary Handout

Provider: **American Specialties**

AIA Course Number: **IAS10B**

Length: **1 Hour**

Credits: **1 AIA HSW CE Hour**

**Course fulfills state accessibility/ADA/Barrier-free CE**

Course Title: **Accessibility Disconnects in Toilet Room Design**

### Description

This course will inform design professionals about the accessible elements of a multi-user toilet room. Designers will learn about toilet room compliance with applicable accessibility codes and regulations. Appropriate materials for toilet room use and issues related to usability, abuse, warranty and LEED and how this can improve occupant comfort, health, and ease of use will be reviewed.

### Learning Objectives

Upon completion of this course, the design professional will be able to:

1. Describe the need for universal design
2. Explain the role of ADA in accessible design
3. Identify and analyze accessible elements of a multi-user washroom to determine compliance with applicable accessibility codes, regulations, and guidelines
4. Examine accessible components and describe typical design and installation disconnects
5. Review fixture placement
6. Identify material types appropriate for washroom use and issues related to usability, abuse, warranty, and LEED

### Method of Delivery

The course is offered to design professionals in a live setting.
