REVISED: 24 Sept 2013

WALL PROTECTOR BACKSPLASH PLATE WITH MOUNTING FRAME

NOTE:
 ALL DIM'S
 INCH (MM)

SPECIFICATION

Wall Protector Backsplash Plate with Mounting Frame shall be proprietary absorptive-evaporative ceramic matching composition of water droplet evaporator plate on ASI Model № 20200 TRI-Umph™ hand dryer and shall have a black powder coated 20 gage steel frame suitable for surface mounting with eight (8) screws (by others). Absorptive-evaporative plate shall be 9/32" (7.4) thick and have face finish of medium matte gray to match ASI Model № 20200 TRI-Umph™ hand dryer. Frame shall be formed from one piece of steel and have no exposed seams or welded joints and shall have four (4) exposed mounting tabs formed from frame edges. Frame shall hold plate on all edges and only the gray face shall be visible inside the black frame.

Absorptive Backsplash with Mounting Frame shall be Model № A0247-TRBS of American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Mount unit on wall surface using eight (8) № 8 self-tapping screws (by others) through exposed 3/16" diameter (Ø4.8) mounting holes into appropriately prepared anchors (by others). Center the unit directly behind the hand chamber of ASI Model № 20200 TRI-Umph™ hand dryer.

OPERATION

Plate absorbs water droplets that may blast past the absorptive-evaporative ceramic evaporator plate on ASI Model № 20200 TRI-Umph™ hand dryer. Plate continuously evaporates water at a rate matching the absorption of cast-off droplets from hand dryer usage. Water cast-off droplets absorbed and subsequently evaporated from plate are prevented from soaking into wall finish behind. Plate may be cleaned at the same time as the dryer unit following instructions found in the dryer Owner Manual.
