**NOTES:**

1. See individual product data sheets to determine which options apply to each unit.
2. More than one option may be specified by grouping suffixes (eg. -0113 indicating 2 liquid soap valves and tempered glass mirror).
3. Those glazing types marked with an asterisk (\*) are suited to applications where frequent breakage and/or security problems exist. These surfaces are best specified for use in prisons, schools, police stations, hospital wards, etc., where shards of broken glass might be used as weapons. The reflective qualities of these mirror types are not as true as plate glass.
4. Refer to glazing options sheet for complete description of glazing types.
